"Short Description for Internal Candidates

Android Native 3 yrs with kotlin + React native - 1 yr

Description for Internal Candidates

We are in search of talented software developers focused on Android and who can deliver quality work with continuous integration and automated test frameworks. So if you feel that your skill set can bring a revolution in the Android world, you are the one we want to provide with all the resources to innovate and implement. As a Android Developer you will:

1/6/24, 10:05 AMDeveloper - Android - Illinois - Indeed.com

Design & develop the Android application as per desired specifications. Own end to end product modules/features (from requirement to going live). Design & code review, troubleshoot & help team members on issues. Gather requirements by interacting directly with the end users. Research on open source framework/technology required for developing the feature/application. As a candidate you must posses knowledge of: Experience in Android-specific application development. Good understanding of OO concepts. Experience in Kotlin preferred. Good understanding of Design Patterns necessary. Proficient in requirement gathering and analysis. At least two commercially published applications available for immediate download and review of your contributions by our development team. A solid understanding of operating system fundamentals such as processes, inter-process communication, multi-threading primitives, race conditions and deadlocks"
